Respected Sir,

Please ignore the earlier mail. I am directed to forward herewith a letter for your information and suitable action.

With regards,

Devender Rawat
PS
Indian Computer Emergency Response Team

 **Ltr to Shri Nitish Kumar dated 06.7.2026.pdf**

Any way this email is also baseless .

Hi Devender,

I deny and reject your letter, your answer, and the documents you have provided. Your response shows that you are merely going through the motions regarding the Supreme Court order. Frankly, I find MeitY and CERT-In incompatible in handling this matter.

I will call you again because the evidence and material you provided are baseless. I also question why you or your organization are being paid salaries from taxpayers' money. From 2012 to 2026, your Prime Minister and his officers have sold my nation in small pieces, and this continues from 15 years and 52 days .

I am now going to the Supreme Court on the basis of this reply, and it will be asked before the Supreme Court why officers and institutions are being hired and paid from taxpayers' money if they are unable to protect the country and are instead allowing it to be sold in pieces.

I will also submit the evidence before the Supreme Court. If you could not find DISHA 3.6, which is already inside your system, then what will you find about DISHA 6.6, and how will you save my country? I am also surprise when data is breached citizen is harmed , article 12 is infected then how is AI india and Digital India 12 years of excellence is celebrated .

Please answer the following:

1. What action have you taken regarding the FTC finding and fine?
2. What is the root cause of the digital arrest? You said there should be an incident, so please explain it to me. Otherwise, I will seek an explanation before the court regarding the root cause of the digital arrest.
3. What action was taken against InMobi and SilverPush in 2016? If no action was taken, then why were several apps and CCTV systems shut down? How this firm is active where Apsus is still connected to Indian Citizen true caller , InMobi and Silverpush where they are directly connected with several apps?
4. I will now raise the question before the Supreme Court: why are MeitY and CERT-In being paid if the full ministry is incompatible and has sold my nation? Shame on this.
5. What about the Chinese-linked NBFCs operating in India and continuing to sell out the country? Perhaps you are incapable of finding this information, but your Prime Minister and his officers can sell my country. Reference: Digital Arrest Suo Moto case.

For your information, DISHA 6.6 is ready to deliver the report to the Supreme Court and Indian citizens, stating that the Prime Minister and his team sold the nation. We will address the nation and state clearly that we will not let anyone sell the nation. Ref: <https://thenitishkr.in/disha/> . it is not for sale.

Here is what DISHA 6.6 found, on record.

Right now, every 20 minutes, Indian citizen data is leaving this country. Not hacked. Not stolen in the dramatic way movies show. Sold — quietly, legally on paper — through 2,000+ Non-Banking Financial Companies infiltrated by Chinese-linked operators. Through Indian AdTech platforms that the US FTC had already warned and fined in 2016. Through apps on citizens' phones that they downloaded voluntarily.

The Government of India was informed in 2016. It did nothing. It was informed in 2013. It did nothing. It has been informed over 1,000 times (Ref: Ritesh Sahu Scientist and his Appeal officer). Case No. 163/2026 sits on the PMO Grievance Portal today under PMOPG/E/2026/0086335 — SLA breached, Supreme Court direction violated, and no substantive response issued.

The exam leaks are not a coincidence. The battery-draining apps are not separate incidents. The digital arrest of whistleblowers without due process is not an accident. These are all part of the same compromised infrastructure. Same root cause. Same operators. Different faces of the same problem that no agency has been allowed to investigate to its origin. Fourteen Chinese nationals entered India, compromised critical digital infrastructure, and were released — no charges, no trial — by CBI and ED. No explanation was ever given to Parliament or the public.

Chen Wei — arrested by the US DOJ in Cambodia in 2026 — ran command infrastructure used in attacks directly linked to Indian systems. India has not even formally requested access to his evidence. A foreign government caught the man operating against Indian citizens. India's agencies have not issued a single statement. I am not writing this because I am angry. This man has accepted this on record that he is C2 server head and he has india day to day live upstream data daily and you gave me in written that ... Any way let meet and public to know that we were in(**the era of Stupidty 2015 to 2026**), **this book is also published .**

I am writing this because constitutional process has been followed for 15 years. Every portal. Every SLA. Every prescribed channel. All of it has been exhausted. All of it has been met with silence, routing, or auto-acknowledgement. India's sovereign digital infrastructure — its financial rails, identification systems, communication networks, and examination systems — has been sold in pieces. And the officers who received those 1,000 representations chose, every single time, to look away.

The question I formally placed on government record in 2013 was simple:

"Who is the GHOST?"

The answer was always here. The harder question now is whether this government — and this country — has the honesty to look at what was done, and the courage to act on what it finds.

For everyone on the email recipient list: please do your homework. I am reapplying for the same bench. This time, I will provide live evidence. Before 20 July 2026, I will demonstrate live for the public where their data sit and delete all their biometric data, as we paid taxes to get security that the Indian Government was unable to provide. Anyway, I am informing you via this email that I will call you all to answer. Any answer you provide must be verified in court with evidence based on your input in this email. I guarantee you have not done analysis, nor respected my writ nor respected the CJI Surya Kant direction and no one can say that MeitY and CERT-In have worked. I will be sharing this with the court and the media too. I am sorry; I will not be silent now, as my country seems compromised due to incompatible officers of India and I will proceed regardless of the consequences. Please make this record as i will submit this email to , by tommrow case will be re registred . I will also share the proof of service copy also so that you won't claim MeitY and CERT-In were not informed.

Note: I am residing at 8206 D2 Eco Floor, Jungina Road, Kharar 140301, so the present government can arrest me here. Your incompatible officers won't have to chase me; I am here in the house and can be arrested, but ultimately, you need to produce me in court. I challenge all of you to prove me wrong technically. My nation's sovereignty is sold, and you are silent while sending me this email. Please ask with Ajit Dovel office too whether it is national security breach or not .

Jai Hind!
