Chandigarh, India - June 5, 2026 - *Era of Stupidity: Citizen Not Found*, by author and public-interest researcher **Nitish Kumar (thenitishkr)**, examines one of the most difficult questions of India's digital decade: when a citizen exists across databases, identity systems, grievance portals, court records, government correspondence, cyber evidence, and technical material, why does he so often disappear at the moment of remedy?

The book is not a rejection of Digital India. It is a constitutional inquiry into its underside. Between 2015 and 2025, the citizen became more searchable than ever. Yet the central constitutional question remains unresolved: if the State can find the citizen for verification, compliance, surveillance, classification, and extraction, can it also find him for justice?

At the centre of the book is the phrase **Citizen Not Found**. It does not mean that the citizen is absent. It means the opposite. He is present in records, but may become invisible when accountability is demanded.

The work brings together public records, cyber evidence, technical analysis, government correspondence, Article 12 research, DISHA Intelligence Architecture, Crime Cause records, and Supreme Court of India material, including the record trail connected to **W.P.(Cri.) No. 163/2026**. It does not present allegations as final judicial findings. It presents them as part of a public-interest evidence record.

Why This Matters Now

India's public conversation around digital arrest, cyber fraud, loan-app abuse, KYC harvesting, photo morphing, online extortion, biometric identity, data breach, citizen data custody, and AI-driven public systems has moved from the margins to the centre of civic life.

Note to Editors and Journalists

References to cybercrime, alleged Chinese-linked networks, alleged C2 server infrastructure, public authority correspondence, and Supreme Court-related records should be read within a public-interest evidence framework. Allegations remain allegations unless established by a competent judicial or official authority.
